

Water Smart Gardening

To learn about water smart gardening, simply click on the flyer and get started with the Online Gardening Tool. This informational website will allow you to view local water smart gardens for design ideas. You'll be able to identify plants by simply clicking on the plant(s) of your choice. You'll be able to plan your water smart garden and best of all print a list of all the plants you've selected to take on your shopping trip.

You can also visit the "Water Saving Tips" website and view helpful information on how to conserve water.

If you are looking for a "green gardener", visit the Monterey Bay Green Gardener Program website. Here, you can find a "green gardener" in your area. The Monterey Bay Green Gardener Program also provides professional training and certification in ecological landscaping.
